Greetings!

We would like to introduce **ODONATA NURSING SOLUTIONS**.

An independent nursing agency, with one of our specialties being anaesthetic nursing, particularly in a dental setting.

Offering mobile nursing staff, when you need it. Geographically flexible, with Anaesthesia and Recovery Room experience.

All staff are ACLS, PALS, and BLS certified, and have Professional Liability Protection. In good standing with the College of Nurses. As well, everyone is Covid 19 vaccinated. Skills include use of anaesthesia equipment, medications, airway management, patient monitoring, charting, apnea/ventilation, recovery, and discharge education.

Our staff experience ranges from 7-28 years, and come with professional references if preferred.

We realize this is a specialty area, and not always easy to staff without prior experience and knowledge. Along with some glowing personalities, our staff are eager and able, reliable and punctual, and look forward to meeting you!

For additional information and specifics, please contact Michelle as indicated above.

Thanking you in advance,
ODONATA NURSING SOLUTIONS
